

Neonatal Resuscitation Program

Quick Equipment Checklist

Warm	• Preheat warmer
	• Warm towels or blankets
Thermoregulate	• Plastic bag or plastic saran wrap
	• Hat
	• Thermal mattress (<32 weeks gestation)
Clear Airway	• Bulb syringe
	• Suction canister attached to wall suction. Set wall suction at 80 to 100 mmHg
	• Suction catheters 8F & 10F
Auscultate	• Stethoscope
Ventilate	• PPV device – NeoPuff and ventilation bag
	• Oxygen blender set to 21%. (21 – 30% if <35 weeks gestation)
	• Flowmeter set to 10L
	• Term and pre-term sized masks
	• Feeding tube 6F and 8F
	• 20-mL syringe
Oxygenate	• Pulse oximeter with sensor and cable
	• Free-flowing oxygen: (mask, O2 tubing, T-piece)
	• Target oxygen saturation table
Intubate	• Laryngoscope handle
	• Laryngoscope straight blades (size -0, size -00, size -1)
	• Stylet
	• Endotracheal tubes (sizes 2.5, 3.0, 3.5)
	• Tape
	• 5-mL syringe
Medicate	• Adrenaline 0.1 mg/mL (1:10,000)
	• Normal saline
	• UV catheter/OG catheter
	• Documentation Resuscitation Form
